

SASOL

reaching new frontiers

11 July 2016

To whom it may concern:
Glencore mines

Re: Compatibility approval of Rock filler mining foam

Sasol were requested by Glencore mines to test the Rock Filler Mining foam's compatibility with the Sasol Explosive range.

Tests were done against the Sasol Bulk Emulsion intermediates, bulk emulsion explosives as well as Sasol expanfo range. These tests were done by the Research Department in Secunda and the product was found to be compatible.

Trust that this communication meets your approval and that you will contact me if any further information is required.

Best Regards,

DF Joubert
